

DAY 5 REPORT

Resume Text Extraction Engine

Objective

Implemented a resume text extraction engine that extracts raw text from PDF and DOCX resumes for use in an ATS pipeline.

Deliverables

- Resume text extraction engine
- Cleaned resume outputs
- Test result logs

Implementation Summary

- Built parsers/resume_text_extractor.py
- Added PDF extraction using pdfplumber
- Added DOCX extraction using python-docx
- Automatically detects file extension
- Successfully tested using multiple resumes

Execution Result

```
1 from parsers.resume_text_extractor import extract_resume_text
2
3
4
5
6
7
8
9
10
11
12
13
14
15
16
```

```
def main():
    file_path = "data/resumes/ai-developer-resume.docx"
    text = extract_resume_text(file_path)
    print("\n=====")
    print(text)
    print("=====")

if __name__ == "__main__":
    main()
```

```
PS E:\Zecser Technology\Tasks Completed\zecpath-ai-system> python main.py
Selected file: data/resumes/ai-developer-resume.docx
Extension: .docx

Reading DOCX: data/resumes/ai-developer-resume.docx
Paragraphs found: 34

Sophia Martinez
Northwood, OH 43623
(555)555-5555 - Sophia.Martinez@example.com
Professional Summary
Innovative AI Software Developer with expertise in machine learning, utilizing Python and TensorFlow to deliver impactful solutions. Proven track record in boosting predictive power and optimizing neural networks.
Work History
AI Software Developer
January 2024 to August 2025
DeepTech Innovations - Northwood, OH
Developed AI algorithms, boosting accuracy by 20%
Implemented a new ML pipeline, reducing processing time
Optimized neural networks, improving efficiency by 35%
Machine Learning Engineer
January 2022 to December 2023
Quantum AI Systems - Cleveland, OH
Designed ML models, increasing predictive power by 15%
```

Console output confirming successful extraction across sample resumes

The screenshot shows a VS Code editor with a file explorer on the left, a code editor in the center, and a terminal at the bottom. The file explorer shows a project named 'ZECPATH-AI-SYSTEM' with folders like 'data', 'parsers', and 'utils'. The code editor shows a Python file 'main.py' with the following code:

```

1 from parsers.resume_text_extractor import extract_resume_text
2
3
4 def main():
5
6     file_path = "data/resumes/data-scientist-resume.pdf"
7
8     text = extract_resume_text(file_path)
9
10    print("\n=====")
11    print(text)
12    print("=====")
13
14
15 if __name__ == "__main__":
16     main()

```

The terminal at the bottom shows the command 'python main.py' being executed, followed by the output of the script:

```

PS E:\Zecser Tecnology\Tasks Completed\zecpath-ai-system> python main.py

EDUCATION
• Assisted in the cleansing and preprocessing of over 200,000 data records,
Bachelor of Science in Data improving dataset quality for analysis.
• Developed a predictive sales model using Python, increasing forecast accuracy
Science
by 15% for quarterly sales meetings.
Purdue University • Collaborated with marketing teams to design data-driven strategies, enhancing
campaign effectiveness by analyzing customer behavior.
01/2023 - 01/2026 West Lafayette, IN

```

Console output confirming successful extraction across sample resumes

Expected Deliverables

- Create automated test runs

Conclusion

The extraction engine successfully reads PDF and DOCX resumes and produces clean text output. This completes Day 5 and prepares the project for structured resume parsing.
