INTERESTS

Retail Analytics

Inspired by how data can revolutionize marketing and sales strategies for retailers.

SUMMARY

Driven to leverage a strong foundation in data science to develop impactful analytical models for retail challenges. Proficient in Python, R, SQL, and experienced in creating data-driven solutions. Aspires to advance analytical expertise while contributing to innovative projects in the retail analytics sector.

EXPERIENCE

Data Science Intern

01/2026 - 01/2026

Clarity Analytics

Remote

- Assisted in the cleansing and preprocessing of over 200,000 data records, improving dataset quality for analysis.
- Developed a predictive sales model using Python, increasing forecast accuracy by 15% for quarterly sales meetings.
- Collaborated with marketing teams to design data-driven strategies, enhancing campaign effectiveness by analyzing customer behavior.
- Utilized SQL to extract and manipulate data regularly from two large-scale databases for business reporting.
- Presented complex data insights and findings to stakeholders, refining communication skills and adapting to a non-technical audience.
- Contributed to the implementation of routine data quality checks, ensuring continuous improvement of analytical processes.

Data Analytics Volunteer

01/2025 - 01/2025

Food Rescue US

Indianapolis, IN

- Designed and implemented a new data tracking system, increasing efficiency by 20% in reporting donation metrics.
- Analyzed logistical data to propose routes that decreased delivery times by an average of 10%.
- Conducted weekly data review sessions enhancing team collaboration and problem-solving skills.
- Engaged with cross-functional teams to align data insights with operational goals during bi-weekly strategy meetings.
